

XXII SGEM GeoConference 2022 - evaluated and indexed by Scopus, Web of Science, EBSCO etc.

2 July - 11 July 2022

ABSTRACT DEADLINE EXTENDED: 5.06.2022

The International Multidisciplinary Scientific GeoConference SGEM is focused on **Global Warming, Climate Change, CO₂ Reduction, Biodiversity, and Green Technologies for a Sustainable Future.**

Dear colleagues,

We are happy to remind you that the ABSTRACTS DEADLINE for the XXII SGEM GeoConference 2022 has been extended until the 5th of June 2022. The conference is organized by SWS Scholarly Society Vienna, with our partners and supporters from European academies of science and many world universities.

The extension of the deadline for early-bird registrations is due to the inquiries of many colleagues and our desire to help as much as possible all scientists affected to some extent by the terrible events that are happening in Europe. We hope that together we will overcome everything easier. We have time, do not hesitate to

send your articles and register.

We hope that these terrible times will not disrupt our work. Science and Art are timeless, independent, and at levels where there are no politicians, games, and interests. It is worth living for Science and Art because this is the only place where we can touch the Divine.

Welcome to join us this summer! Share your scientific achievements and take a well-deserved holiday [with your families and children](#).

Each of you has an [EMS account](#) (or can create a new one if attending a conference for the first time), where in addition to your account details, you can register for this year's event, upload your reports, book a hotel and transport, download a proforma invoice or make a credit card payment.

We inform you, that the conference proceedings of 2021 have been sent for evaluation and indexing of the most prestigious databases Scopus, Web of Sciences, EBSCO, ProQuest, Petroleum Abstracts, Crossref, Google Scholar, etc.

As a special compliment to you, and despite the global inflation, we kept the conference fees at the same level as in recent years. We hope this will help you and make it financially easier.

We look forward to seeing you this summer at the Paradise Blue Congress Center in Albená SPA Resort, where we shall devote ourselves to serious scientific discussions and presentations, [many interesting workshops](#), and a special social program for your relaxation.
