*თემა: "PIAZZA (SQUARES) IN THE ARCHITECTURE OF FLORENCE"*

22 ნოემბერი 2018 წ.

We have the honour to introduce to you the workshop titled "**PIAZZA (SQUARES) IN THE ARCHITECTURE OF FLORENCE**" that will be organized jointly by Foundation of Romualdo Del Bianco and Azerbaijan University of Architecture and Construction in March, 2019, in Florence, Italy.

**NECESSARY INFORMATION ON WORKSHOP**

**1. MAIN PRINCIPLES OF WORKSHOP**

Usually the workshop lasts 1 week, students from each country must prepare the presentations about their town, country etc. under the topic of the workshop. During the opening of the workshop in Florence they must demonstrate it to other participants. So we all will know citation with the historical squares in each country.

After that tutors of all the foreign teams all together will explain to the students the main task and targets. We will mix the groups (that means the students from different Universities will work together sharing their abilities and learning from each other) and they will continue their work themselves without participation of tutors. We already conducted such workshops and the titles "Palazzo in the architecture of Florence" and "Churches in the architecture of Florence". As for me this is good possibility for students to study Florentine architecture, take pictures, study the history and give their recommendations on preservation of the monuments.

Workshop will be dedicated to study of squares that are of especial importance and interest in the architecture of Florence. I think here they will study complex of problem such as history of formation of the square, of the buildings formed, problems with preservation it etc.

The main idea of the given project is to create the possibility for the students of different universities over the world to come to Florence, visit monuments of the town, walk through the streets studying the uniqueness of Florence, taking pictures and realizing the main peculiarities of the town's appearance. As the result of joint work of students from different universities on understanding what is the origin of Florence' beauty, "genius loci" of the town, they will introduce their vision of the town, analyses of main peculiarities of any building, including not only main "tourist" objects, but also some unknown architectural buildings of Florence.

We do hope that you will find interesting this workshop topic and will participate in it with your students (as usual 1-2 tutors and 4-5 students).

**2. HOW TO JOIN**

To be able to participate first of all tutor of the workshop have to enter and register to the portal Life Beyond Tourism and upload 3 cultural expressions of your country (typical shops, traditional activities, manufactory, craftsmanship, etc..)

Then you will deliver to each owner the Certificate Life Beyond Tourism. And you will send brief presentation with the photos of their adhesion (to address [workshops@lifebeyondtourism.org](mailto:workshops@lifebeyondtourism.org) or [iilbt@lifebeyondtourism.org](mailto:iilbt@lifebeyondtourism.org))

**3. EXPENCES**

All expenses will be covered by participants. The registration fee is 350 euro and not included the accommodation. Foundation will provide us by rooms and all necessary equipment for workshop. During workshop students will be able to visit museums for free.

We do hope that you will find interesting this workshop topic and will participate in it with your students (as usual 1-2 tutors and 4-5 students).

Due to very short time left I ask you to inform me in the case of your interest to participate before 25.12.2018

Sincerely yours,

Sabina Hajiyeva, ScDr., prof. Azerbaijan University of Architecture and Construction
